

JALAPENO 1415/1820/2030/2840-R/2840-O/3545

M&R Global's Copperhead Jalapeno is a versatile and compact flash curing unit that is easy to install and provides exceptional performance for a competitive price. The Jalapeno has been designed to optimize and balance the heat across the printed area during flashing, which minimizes scorching and provides better consistency across different ink and shirt colors. The improved airflow of the Jalapeno provides particularly good results on waterbase inks. The quartz flash switches activate as the pallets start to move to minimize warm-up delays. Each Copperhead Jalapeno comes with built-in electrical system connectors to easily plug in with a Copperhead Automatic Screen Printing Presses main control functions, so no additional wiring or cables are required. Smooth rolling, locking casters makes moving the flash fast & easy.

JALAPENO SA

Jalapeno SA is M&R Global's most sophisticated and versatile freestanding quartz flash cure system. It has a universal design that can fit most brands' presses. An adjustable sensor switch can be positioned on either side of the flash cure unit, activating the flash when the printing pallet approaches. It uses medium-wave filament quartz lamps which provide exceptional heating. Flash cure duration can be controlled by an analog timer. The flash cure unit ensures consistent curing with a reflector array & forced air heat exchange. All the lamps can be individually controlled with the toggle switches present on the flash body. Using fewer lamps on small screen print areas reduces ambient heat, lowers energy costs, and leads to faster substrate cooling. Lamp height can be adjusted up to 102 cm (40"). Smooth rolling, locking casters makes moving the flash fast & easy.

SPECIFICATIONS

	JALAPENO 1415 (IN-HEAD)	JALAPENO 1820 (IN-HEAD)	JALAPENO 1820	JALAPENO 2030	JALAPENO 2840-R	JALAPENO 2840-O	JALAPENO 3545
